

Author index to volume 2 for 1995 year

	Issue	Page
Aminov Yu.A. and Nabelo M. L. On toroidal submanifolds of constant negative curvature	3/4	275
Arov D. Z. Gamma-generating matrices, J -inner matrix functions and related extrapolation problems. 4.	1	3
Beauville A. Quantum cohomology of complete intersections	3/4	384
Borisenko A.A. and Ostroumov S.A. On the cylindricity of complete strong parabolic Kahler submanifolds in complex Hermitian space . . .	3/4	284
Boutet de Monvel L. Star products on conic Poisson manifolds of constant rank	2	143
Boutet de Monvel A., Marchenko A., and Pastur L. The multistability in the stationary scattering problem for a nonlinear mean-field model . .	3/4	296
Brodzki J., Connes A., and Ellwood D. Polarized modules and Fredholm modules	1	15
Brusentsev A. G. On essential self-adjointness of semi-bounded elliptic second order operators without requirement of completeness of the Riemannian manifold	2	152
Burnaev B. and Tarapov I.Ye. Sound waves in a variable mass medium . .	3/4	399
Chistyakov G. P. and Pergamentsev S. Yu. Some extensions of the Darmois-Skitovich and Kagan theorems to the classes of the generalized random variables	3/4	463
Chudinovich I. Yu. The solvability of the first main mixed problem of the theory of elasticity in a complete scale of Sobolev spaces	1	129
Chudinovich I. Yu. The solvability of the second main mixed problem of the theory of elasticity in a complete scale of Sobolev spaces	3/4	356
Chueshov I.D. and Rezounenko A.V. Global attractors for a class of retarded quasilinear partial differential equations	3/4	363
Connes A. (see Brodzki J., Connes A., and Ellwood D. Polarized modules and Fredholm modules)	1	15
Denisov V. I. On a property in the large of the space-time of a plane homogeneous wave	1	42

Ellwood D. (see Brodzki J., Connes A., and Ellwood D. Polarized modules and Fredholm modules)	1	15
Fryntov A.E. A simple proof of Dubinin's theorem	3/4	347
Georgescu E. (see Grünfeld C. P. and Georgescu E. On a class of kinetic equations for reacting gas mixtures)	3/4	408
Gordevsky V. D. An approximate bimodal solution of the nonlinear Boltzmann equation for hard spheres	2	168
Gorkaviy V. A. On reconstruction of a 3-dimensional submanifold of a 5-dimensional Euclidean space from a degenerate 2-dimensional Grassmann image	1	25
Grishin A. F. Continuity and asymptotic continuity of subharmonic functions. Part 2	2	177
Grünfeld C. P. and Georgescu E. On a class of kinetic equations for reacting gas mixtures	3/4	408
Gurin A. M. Rigid packing of balls	2	194
Ignatenko V. F. Algebraical surfaces with an infinite set of skew symmetry planes. III	2	201
Karolinsky E.A. The symplectic leaves on Poisson homogeneous spaces of Poisson-Lee groups	3/4	306
Kellerman A. Yu. Extension of uniformly convex norms	3/4	312
Koosis P. A relation between two results about entire functions of exponential type	2	212
Krasnyanskiy M. B. Homogenization of random walk on lattices with weak connections	1	51
Kuznetsov O.V. On construction of isometric immersions of the domains of Lobachevsky plane L^2 into E^4 by using solutions of the "sine-Gordon" equation	3/4	319
Lysenko S. A. On the functional equation $f(p(z)) = g(q(z))$, where f and g are meromorphic functions, and p, q — polynomials	1	68
Marchenko A. (see Boutet de Monvel A., Marchenko A., and Pastur L. The multistability in the stationary scattering problem for a nonlinear mean-field model)	3/4	296

Medianik A. I. On construction of Hadamard matrices	1	87
Milka A. D. Uniqueness theorems for spacelike convex polytopes in a pseudoeuclidean space	2	232
Ostroumov S.A. (see <i>Borisenko A.A. and Ostroumov S.A. On the cylindricity of complete strong parabolic Kahler submanifolds in complex Hermitian space</i>)	3/4	284
Ostrovskii I. V. Analytic and asymptotic properties of multivariate Linnik's distribution	3/4	436
Pankratov L. S. The second boundary value problem solutions asymptotic behaviour in the domains with random thin channels	1	94
Pastur L. (see <i>Boutet de Monvel A., Marchenko A., and Pastur L. The multistability in the stationary scattering problem for a nonlinear mean-field model</i>)	3/4	296
Pergamentsev S. Yu. (see <i>Chistyakov G. P. and Pergamentsev S. Yu. Some extensions of the Darmois-Skitovich and Kagan theorems to the classes of the generalized random variables</i>)	3/4	463
Perlova N. G. On the relation between the rigidity of order $k > 3$ and analytical nonbending of surfaces	3/4	456
Rabelo M. L. (see <i>Aminov Yu.A. and Rabelo M. L. On toroidal submanifolds of constant negative curvature</i>)	3/4	275
Rashkovskii A. Yu. Currents associated with holomorphic almost periodic mappings	2	186
Rezounenko A.V. (see <i>Chueshov I.D. and Rezounenko A.V. Global attractors for a class of retarded quasilinear partial differential equations</i>)	3/4	363
Ronkin L. I. Holomorphic periodic functions and periodic divisors	1	108
Ronkin L.I. Periodic algebraic divisors	3/4	329
Tarapov I.Ye. (see <i>Burnaev B. and Tarapov I.Ye. Sound waves in a variable mass medium</i>)	3/4	399
Ulanovskii M. A. The cut locus and conjugate points of geodesics in Lorentz and Riemannian spaces	1	123
Ulanovskii M.A. Conjugate points of the geodesics	3/4	338
Zalgaller V. A. Two questions concerning shortest paths on a convex surface	2	197
