

# Author index to volume 1 for 1994 year

	Issue	Page
Agranovich P. Z. On the functions of completely regular growth on a distinguished variable . . . . .	3/4	363
Aminov Yu. A. On the embeddings of a Euclidean plane into $E^4$ with vanishing Gaussian torsion . . . . .	3/4	380
Anders I. A. Curved asymptotic solitons of the Kadomtsev–Petviashvili-I equation . . . . .	2	175
Anoshchenko O. A. On the existence and uniqueness of the solution of the system of equations describing suspension motion for the Hölder classes . . . . .	1	31
Azarin V. S. and Giner V. B. Limit sets of entire functions and completeness of exponential systems . . . . .	1	3
Berestovsky V. N. Manifolds with intrinsic metric with one-side bounded curvature in the sense of A. D. Alexandrov . . . . .	1	41
Borisenko A. A. and Ostroumov S. A. On the structure of parabolic Kähler submanifolds in Kähler manifolds . . . . .	1	60
Boutet de Monvel A. and Marchenko V. Generalization of the Darboux transform . . . . .	3/4	479
Boutet de Monvel L. and Khruslov E. Ya. Homogenized model for the diffusion of coloured particles in domains with small obstacles . . . . .	1	78
Chueshov I. D. Quasistatic version of the system of von Karman equations	1	149
Diskant V. I. Improvement of the isodiametral inequality in the Minkowski geometry . . . . .	2	216
Diskant V. I. Generalization of the Bonnezen inequalities in the Minkowski geometry . . . . .	3/4	450
Favorov S. Yu. On growth of holomorphic maps from finite dimensional space into banach space . . . . .	2	240
Fryntov A. E. An uniqueness theorem connected with weight polynomial approximation on a sequence . . . . .	2	252
Gabrielyan S. S. On a characterization of a Cauchy distribution on groups by identical distribution of a monomial and a linear statistics . . . . .	3/4	410

Gentosh O. E., Goldberg A. A., and Moravetskaya O. N. Geometrical criteria of the existence of strip and angular derivatives for some classes of conformal mappings . . . . .	1	102
Giner V. D. (see Azarin V. S.) . . . . .	1	3
Goldberg A. A. B. Ya. Levin is a creator of the theory of entire functions of completely regular growth . . . . .	2	186
Goldberg A. A. (see Gentosh O. E.) . . . . .	1	102
Golodets V. Ya., Olexenko V. M., and Sansuc J.-J. Simplicity of A. van Daele algebra for finite-dimensional $C^*$ -Hopf algebras . . . . .	3/4	416
Grinshpun V. Z. Exponential localization of finite-difference infinite-order operator with random potential . . . . .	3/4	424
Grishin A. F. Continuity and asymptotic continuity of subharmonic functions . . . . .	2	193
Iftimovici A. Hard-core scattering for $N$ -body systems . . . . .	2	265
Khruslov E. Ya. (see Boutet de Monvel L.) . . . . .	1	78
Kuznetsov O. V. Isometric embeddings of some domains of the Lobachevsky plane $L^2$ into $E^4$ with vanishing Gaussian torsion . . . . .	3/4	462
Malyutin K. G. The problem of multiple interpolation in the class of analytical functions of a completely regular growth in an open half-plane . . . . .	3/4	469
Marchenko V. (see Boutet de Monvel A.) . . . . .	3/4	479
Masal'tsev L. A. Pseudospherical Bianchi's congruencies in $E^{2n-1}$ . . . . .	3/4	505
Milka A. D. Linear bendings of regular convex polyhedrons . . . . .	1	116
Moravetskaya O. N. (see Gentosh O. E.) . . . . .	1	102
Nikolaevskii Yu. A. Totally umbilical submanifolds of symmetric space . . . . .	2	314
Okrut S. I. Curvature structure of a Riemannian manifold with the axiom of hyperplanes . . . . .	2	227
Olexenko V. M. (see Golodets V. Ya.) . . . . .	3/4	416
Ostrovskii M. I. Note on analytical representability of maps inverse to the integral operators . . . . .	3/4	513
Ostroumov S. A. (see Borisenko A. A.) . . . . .	1	60

Pastur L. A. and Shcherbina M. V. Eigenvalue distribution for a certain class of random matrices in the limit of their infinite order . . . . .	1	131
Rofe-Beketov F. S. On the estimate of growth of solutions of the canonical almost periodic-systems . . . . .	1	139
Rovenski V. Yu. Geodesic foliations with positive mixed sectional curvature . . . . .	2	232
Sansuc J.-J. (see Golodets V. Ya.) . . . . .	3/4	416
Savel'ev V. M. On the theory of curvature for Grassmanian image of submanifold in Euclidean space . . . . .	3/4	520
Shcherbina M. V. (see Pastur L. A.) . . . . .	1	131
Tuptsov A. D. and Zujeva T. I. On the flow function of ideal liquid with vortice lines in annulus . . . . .	3/4	529
Vaksman L. L. Intertwining operators and quantum homogeneous spaces . . . . .	3/4	392
Yampol'sky A. L. On the totally geodesic vector field on a submanifold . . . . .	3/4	540
Zalgaller V. A. On a problem of the shortest space curve of unit width . . . . .	3/4	454
Zujeva T. I. (see Tuptsov A. D.) . . . . .	3/4	529

### *Chronicle*

75 Anniversary of Alexei Vasil'evich Pogorelov . . . . .	1	168
In commemoration of Boris Yakovlevich Levin (1906-1993) . . . . .	2	358
